

# Belay device

The GRIGRI 2 is compact and ultra-light at 185 g (25 % smaller and 20 % lighter than the GRIGRI)

Diagrams for rope installation engraved on interior and exterior of belay device

Stainless steel friction plate and cam for long life

The patented handle's progressive opening action allows for excellent descent control

## GRIGRI 2 D14 2

### Belay device with assisted braking for 8.9 to 11 mm rope

*The GRIGRI 2 belay device with assisted braking is designed to facilitate belay maneuvers. The GRIGRI 2 works equally well for lead climbing and top roping. It may be used on all single dynamic 8.9 to 11 mm ropes on the market (ideal at 9.4 mm to 10.3 mm). Both compact and ultra-light, the GRIGRI 2 will accompany you on climbs around the world for many years. The GRIGRI 2 has a new design that allows excellent control during the descent.*

### Selling points

- Belay technique identical to classic belay systems: both hands on the rope. A fall is stopped by tightening the hand on the free end of the rope.
- Assisted braking capability: during fall arrest, the belayer holds the free end of the rope, the cam pivots and pinches the rope, increasing the braking action until the rope stops sliding.
- The GRIGRI 2 has a new design that allows excellent control during the descent. One hand holds the rope and the other uses the handle to unlock the cam. The patented handle design allows a very gradual release of the rope. In combination with the strong braking action of the cam, it gives a great feeling of control when lowering a partner or rappelling.
- The GRIGRI 2 is compact and ultra-light at 185 g (25 % smaller and 20 % lighter than the GRIGRI)
- The construction includes a stainless steel friction plate and cam to ensure a long life for the product
- For 8.9 to 11 mm single ropes (ideal at 9.4 to 10.3 mm)
- Diagrams for rope installation engraved on belay device (interior and exterior)

### Specifications

Made in France  
 3-year guarantee  
 CE prEN 15151  
 Weight: 185 g  
 Available in three colors:  
 - gray (D14 2G)  
 - orange (D14 2O)  
 - blue (D14 2B)  
 Materials:  
 - aluminum side plates  
 - stainless steel cam and friction plate  
 - reinforced nylon handle  
 For use with single ropes between 8.9 and 11 mm in diameter

### Logistical information

Sold individually
